Note: The vaccine schedule can change. Speak with your health care provider, or call **8-1-1** if you have questions. This immunization table was developed and reviewed by HealthLinkBC, BC Ministry of Health and BC Centre for Disease Control.

² Yearly influenza immunization is recommended and provided free to children 6 months of age and older. Children receiving the vaccine for the first time should get 2 doses 4 weeks apart.

¹ Children who have had chickenpox or shingles disease, confirmed by a lab test, at 1 year of age or older do not need the chickenpox vaccine, and should get the MMR vaccine at 4 years of age.
