Healthy Eating Guidelines
For People with Chewing Difficulties

This resource will help you choose foods that are soft, moist and easy to chew. These eating guidelines may be helpful if you have undergone head, neck or mouth surgery, or have had recent dental work.

Steps you can take

1. Choose soft moist foods. Chop, finely mince, grind, mash or puree foods to a texture you can easily chew.
2. Soften bread products or crackers in soup, milk or tea; or spread with non-hydrogenated margarine, syrup or honey.
3. Use milk, cream, or broth to mash vegetables like potatoes, yams, squash or carrots.
4. Blend banana, melon, or frozen fruit into milkshakes or smoothies.
5. Use gravy, broth or sauce to moisten meat, poultry or fish.
6. Use cheese sauce to moisten vegetables, noodles or rice.
7. Top foods with butter, margarine, oils, salad dressings or sour cream to moisten foods and enhance flavours.
8. For overall health, eat balanced meals each day. Choose foods from all 4 of the food groups in "Eating Well with Canada's Food Guide" www.canada.ca/en/health-canada/services/canada-food-guides.html. Aim to include at least 3 of the 4 food groups at each meal.

The table below will help you choose foods from each food group that are soft and easy to chew.
