HealthLinkBC is access to non-emergency health information and services in British Columbia. It's a phone number, it's a website and it's print resources that put services and health know-how into the hands and homes of B.C. residents.

At HealthLinkBC.ca, the services that British Columbians count on for health information – the advice of nurses, pharmacists and dietitians; a medication library plus the BCHealthGuide handbook and knowledge base – are combined with an online health system navigation service, all easily accessible through one integrated website.

Through HealthLinkBC services you can get the information you need to manage your health and that of your family.

BCHealthGuide

Learn about Health Topics and Medications
Search our database that covers more than 6,000 health topics from A (abdominal concerns) to Z (Zellweger Syndrome). You'll find comprehensive information about each topic and condition, advice on how to treat some situations at home and when to consider it an emergency.

Our medication library puts the expertise of pharmacists at hand with information on most prescribed and many over-the-counter medications.

Check your Symptoms
Our online symptom checker couldn’t be easier to use. Simply click on the body part that concerns you to view an array of possible conditions and situations.

Find Services and Resources
The health system just got easier to navigate with our online way-finder. Simply enter the service you are seeking – flu shots clinics or prenatal programs, for example – along with your postal code to find the service closest to you.
